

## DevResearch Application Form

*Cell Stress* has implemented a waiver program (DevResearch Program) that - depending on the applicant's situation - partly or completely exempts corresponding authors based in developing countries from paying the applicable publication fee upon acceptance. The goal is to facilitate and promote scientific authorship from developing countries.

If you are a corresponding author from a developing country and want to request a publication fee exemption in the frame of *Cell Stress*' DevResearch Program, please mention it in the Cover Letter upon your original submission. Additionally, please fill and attach this DevResearch Application Form to your original submission. Please note, that only applications presented together with your original submission will be considered. Please complete the following information:

<p><b>Name (corresponding author):</b> _____</p> <p><b>Address (including institution):</b> _____</p> <p><b>Current funding source(s):</b> _____</p> <p><b>E-mail address:</b> _____</p> <p><b>Telephone number:</b> _____</p> <p><b>Manuscript title:</b> _____</p>
---

Discounts or complete waivers for corresponding authors from developing countries are granted according to their institutional affiliation and country of residence. Corresponding authors from low-income and lower-middle-income countries as classified by The World Bank (please refer to <http://data.worldbank.org/about/country-classifications/country-and-lending-groups>) are eligible for *Cell Stress*' DevResearch Program. Please mark the box below that applies to your waiver type.

- Group A:** Countries grouped as low-income economies by The World Bank (see above). Accepted applications will entitle to a complete waiver and will not be charged for publication.
- Group B:** Countries grouped as lower-middle-income economies by The World Bank (see above). Accepted applications will entitle to a discount of 50% on the applicable publication fee.

Please return your **completed DevResearch Form** together with your original online submission. Note that receiving editors and reviewers have no access to payment information, and therefore the present application for the DevResearch Program will not influence the decision to publish a manuscript. *Cell Stress*' publisher (Shared Science Publishers) reserves the right to deny any waiver application if false or incomplete information was delivered. In case a paper was published under the DevResearch Program upon false or incomplete information, this may make you liable to such penalties as restrictions on your ability to publish with Shared Science Publishers or *Cell Stress* in the future, involvement of a third party debt collection agency and legal proceedings.
